

Try together

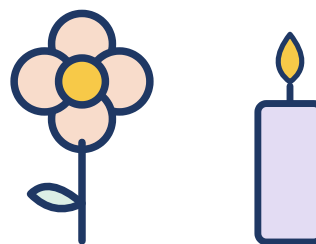

Ways to breathe

Slow breaths help a body calm down. Try them together when everyone is calm, so they are easy to use when a big feeling comes.

Balloon breaths

Hands on your tummy. Breathe in through your nose and fill the balloon. Let the air out slowly through your mouth.

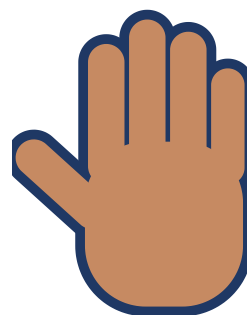

Smell the flower, blow out the candle

Smell the flower: breathe in through your nose. Blow out the candle: breathe out through your mouth.

Star breathing

Trace the star with your finger. Breathe in as you go up a point, breathe out as you go down.

Hand breathing

Trace around your fingers with your other hand. Breathe in going up a finger, out going down.
